

## SMT Cube Temperature Treatment Systems

### The Flexible

Perfect pre-treatment for electronic components and modules.

### Versions of SMT Cube Temperature Treatment Systems:

- for Hot Function Test **60 °C up to 140 °C**
- for **Cooling to Room Temperature**
- for Cold Function Test **-50 °C up to -10 °C**

Machine dimensions of SMT Cube with 20 clusters:  
1.200 mm width (operating side) x 2.500 mm length

### Specials of the System

- Compact, space saving water cooled systems
- Operating side - front
- System doors at front and back side
- Control cabinet at the back side of the system
- SMT software identical with reflow and HTT systems
- Automatic loading of the systems (Option)
- MES, SMEMA & MDS (Option)

- Vertical wheel which can individually be configured, (versions of 16 or 20 clusters)
- Two products per position (loading- & unloading position)
- Manual start/ closing of the product door
- Handling interface (i.e. SMEMA or Siemens)

**Please give us a call – we have the solution for your production requirements.**
